

Indigenous

Peoples of the Americas

1,000 = 1,000

Languages

Years of War

Just like early China & Europe, and even today in Africa, the Indigenous people of America were constantly fighting each other, and with over 1,000 languages, there was constant war.

Hence, while scholars & historians say Christopher Columbus brought disease & destroyed these Indigenous Indians, it was actually the 1,000+ years of war between the tribes that breed disease via the dead bodies, and also caused famine & starvation via fewer tribe members to hunt & grow food.

In the Big Picture view, Columbus finally brought peace to the Americas.
